| <b>Networking and Cybersecurity</b>   |                          | <b>Course Description</b> |               |
|---|--------------------------|---------------------------|---------------|
| <i>Catalog Year: 2024, Required Hours: 630, Credits: 21</i>   |                          |                           |               |
| <b>Foundational Courses (Required Hours: 630, Credits: 21)</b>  |                          |                           |               |
| <i>Aligned Courses (Required Hours: 900, Credits: 30)</i>   |                          | Credits                   | Hours         |
| <b>TEIT 1200</b>  | <b>A+ Core I</b>         | <b>3.00</b>               | <b>90.00</b>  |
| <p>A+ Core I prepares students to be successful computer technicians, capable of installing, maintaining, troubleshooting, optimizing, and securing desktop computers, laptops, mobile devices, and printers. This course aligns with objectives of the CompTIA A+ Core 1 certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Install and configure computer hardware components and peripheral devices.</li> <li>• Identify and configure basic networking components and protocols.</li> <li>• Install and configure laptops and other mobile devices.</li> <li>• Diagnose and troubleshoot device and network issues.</li> <li>• Compare and contrast cloud computing concepts.</li> <li>• Configure client-side virtualization.</li> </ul>  |                          |                           |               |
| <b>TEIT 1210</b>  | <b>A+ Core II</b>        | <b>3.00</b>               | <b>90.00</b>  |
| <p>A+ Core II is a follow-up to A+ Core1 and provides further instruction on installation, configuration, maintenance, and security of various common operating systems and platforms. This course aligns with the objectives of the CompTIA A+ Core 2 certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Install and Configure Windows, Mac, and Linux.</li> <li>• Identify best practices for safety, environmental impacts, communication, and professionalism.</li> <li>• Troubleshoot common operating system, malware, and security issues.</li> <li>• Identify basic vulnerabilities and protect against threats.</li> <li>• Install, configure, and maintain software in computers and mobile devices.</li> </ul>  |                          |                           |               |
| <b>TEIT 2100</b>  | <b>Computer Networks</b> | <b>4.00</b>               | <b>120.00</b> |
| <p>Computer Networks provides instruction on the installation, configuration, management, and troubleshooting of common components of modern computer networks. This course prepares candidates to support networks across multiple platforms and aligns with the objectives of the CompTIA Network+ certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Demonstrate an understanding of core networking concepts and terminology.</li> <li>• Install, configure, and verify the functionality of networking devices and components given multiple scenarios.</li> <li>• Identify network security vulnerabilities and mitigations.</li> <li>• Implement security for a basic network.</li> <li>• Compare and contrast business continuity and disaster recovery concepts.</li> <li>• Troubleshoot common network connectivity issues.</li> </ul> |                          |                           |               |
| <b>TEIT 1300</b>  | <b>Linux Foundations</b> | <b>2.00</b>               | <b>60.00</b>  |
| <p>Linux Foundations focuses on the installation, configuration, and process management of a Linux workstation. Students explore shell programming, file system management, user accounts, access and permissions, and application installation and management.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Install and maintain a Linux workstation.</li> <li>• Configure Linux from the GUI and command line.</li> <li>• Configure file and access permissions.</li> <li>• Perform maintenance tasks including user management, backup and restore, shut down, and reboot.</li> </ul>   |                          |                           |               |
| <b>TEIT 2200</b>  | <b>Security +</b>        | <b>4.00</b>               | <b>120.00</b> |
| <p>Security+ provides instruction on assessing the security posture of enterprise environments and implementing appropriate security solutions. Instruction is given to identify, analyze, and respond to events and incidents. This course aligns with the objectives of the CompTIA Security+ certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Explain security functions and purposes as they relate to network devices.</li> <li>• Identify and implement risk mitigation techniques and strategies.</li> <li>• Distinguish and evaluate different network and physical security threats.</li> <li>• Implement network intrusion detection and prevention technologies.</li> <li>• Identify and execute appropriate cryptography measures.</li> </ul>  |                          |                           |               |

|  |  |             |              |
|--|--|-------------|--------------|
| <b>TEIT 1100</b>   | <b>Introduction to Networking</b>          | <b>1.00</b> | <b>30.00</b> |
| <p>Introduction to Networking provides foundational-level instruction on the concepts, models, services, settings, protocols, topologies, and devices used in computer networks. Students also explore the Open Systems Interconnection (OSI) and Transmission Control Protocol/Internet Protocol (TCP/IP) models.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Define common concepts and terms associated with computer networking.</li> <li>• Identify and differentiate the purpose and function of common networking devices.</li> <li>• Identify and differentiate common networking ports, protocols and services.</li> <li>• Identify components of the OSI and TCP/IP models.</li> <li>• Compare and contrast network topologies and access methods.</li> </ul>  |  |             |              |
| <b>TEIT 1400</b>   | <b>Introduction to Cloud</b>               | <b>2.00</b> | <b>60.00</b> |
| <p>Introduction to Cloud provides instruction on core cloud computing concepts, services, and solutions as well as foundational knowledge from a business value perspective of the benefits and considerations for cloud computing implementation. Included is an overview of popular cloud platforms.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Define the value proposition of cloud computing.</li> <li>• Identify core cloud concepts, services, solutions, and management tools.</li> <li>• Demonstrate an understanding of cloud security considerations, features, and best practices.</li> <li>• Describe cloud identity, governance, privacy, and compliance concepts and features.</li> <li>• Compare and contrast cloud pricing models and identify cost management solutions.</li> <li>• Define cloud deployment models, methods, and operations.</li> </ul>   |  |             |              |
| <b>TEIT 1500</b>   | <b>Introduction to Scripting</b>           | <b>1.00</b> | <b>30.00</b> |
| <p>Introduction to Scripting provides instruction on basic scripting concepts. Students are introduced to scripting fundamentals to automate tasks that would otherwise be performed manually. Students explore the practical use and management of scripts to perform system administration functions.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Demonstrate an understanding of the features of scripting languages.</li> <li>• Implement critical thinking and problem-solving skills through practical exercises.</li> <li>• Perform automation of systems tasks and functions.</li> </ul>   |  |             |              |
| <b>TEIT 1050</b>   | <b>Career and Workplace Relations</b>      | <b>1.00</b> | <b>30.00</b> |
| <p>Career and Workplace Relations is designed to help students gain insight into how their skills and professionalism enhance relationships between management and coworkers. Instruction includes employment skills such as communication, critical thinking, professional etiquette, team dynamics and more.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify personal and transferable skills, competencies and/or abilities.</li> <li>• Create an industry specific resume, cover letter, thank you letter, reference list, and online presence.</li> <li>• Demonstrate effective interviewing skills.</li> <li>• Submit an application for an industry specific position.</li> <li>• Demonstrate effective use of job search websites.</li> </ul>   |  |             |              |
| <b>Supplemental Courses Varies by Institution (Required Hours: 270, Credits: 9)</b>  |  |             |              |
| <i>Davis Technical College (Required Hours: 270, Credits: 9)</i>   |  | Credits     | Hours        |
| <b>TEIT 1000</b>   | <b>Information Technology Fundamentals</b> | <b>2.00</b> | <b>60.00</b> |
| <p>The Information Technology Fundamentals course provides an overview of the various career pathways related to working with computers. Throughout the class, students will be introduced to computers, including their history, hardware, operating systems, system support, programming languages, software, databases, networking, data storage, and system security. During this course, the student will perform essential IT tasks commonly performed by end-users and entry-level IT professionals.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify the major components of a computer and understand their function.</li> <li>• Compare and contrast the differences between various operating systems.</li> <li>• Demonstrate an understanding of basic principles of software and database development.</li> <li>• Identify foundational terms used in computing.</li> <li>• Identify security issues affecting the use of computers and networks.</li> </ul>                                  |  |             |              |
| <b>TEIT 1150</b>   | <b>Cisco CCNA Introduction to Networks</b> | <b>3.00</b> | <b>90.00</b> |
| <p>CCNA Introduction to Networks curriculum introduces the architectures, models, protocols, and networking elements that connect users, devices, applications and data through the Internet and across modern computer networks. Learn to build simple local area networks (LANs) that integrate IP addressing schemes, configure foundational network security, and perform basic configurations for routers and switches.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Build simple LANs, perform basic configurations for routers and switches, and implement IPv4 and IPv6 addressing schemes.</li> <li>• Configure routers, switches, and end devices to provide access to local and remote network resources and to enable end-to-end connectivity between remote devices.</li> <li>• Develop critical thinking and problem-solving skills using real equipment and Cisco Packet Tracer.</li> <li>• Configure and troubleshoot connectivity of a small network using security best practices.</li> </ul> |  |             |              |

|  |  |             |              |
|--|--|-------------|--------------|
| <b>TEIT 1160</b>   | <b>Cisco CCNA Switching, Routing, and Wireless Essentials (SWRE)</b> | <b>3.00</b> | <b>90.00</b> |
| <p>The Cisco CCNA Switching, Routing, and Wireless Essentials (SWRE) course focuses on switching technologies and router operations that support small-to-medium business networks and includes wireless local area network (WLAN) and security concepts. Students learn key switching and routing concepts. They can perform basic network configuration and troubleshooting, identify and mitigate local area network (LAN) security threats, and configure and secure a basic WLAN.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>Utilizing routers, switches and wireless devices, configure and troubleshoot VLANs, Wireless LANs and Inter-VLAN routing.</li> <li>Configure and troubleshoot redundancy on a switched network using STP and EtherChannel.</li> <li>Develop critical thinking and problem-solving skills using real equipment and Cisco Packet Tracer.</li> <li>Explain how to support available and reliable networks using dynamic addressing and first-hop redundancy protocols.</li> </ul>  |  |             |              |
| <b>TEIT 1600</b>   | <b>Microsoft 365 Fundamentals</b>                                    | <b>3.00</b> | <b>90.00</b> |
| <p>The Microsoft 365 Fundamentals course provides instruction on how Microsoft 365 solutions address common organizational technology challenges including productivity, collaboration, and communication. Topics include endpoint and application management, desktop virtualization, automated operating system deployment, Microsoft 365 licensing, deployment and migration assistance, and product support options. This course aligns with the objectives of the Microsoft MS 900 certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>Identify and describe cloud concepts.</li> <li>Describe core Microsoft 365 services and solutions.</li> <li>Describe security, compliance, privacy, and trust in Microsoft 365.</li> <li>Compare and contrast Microsoft 365 licensing, pricing, and support option.</li> </ul>   |  |             |              |
| <b>TEIT 1650</b>   | <b>Remote Desktop Technologies</b>                                   | <b>1.00</b> | <b>30.00</b> |
| <p>The hybrid workplace model mixes in-office and remote work to offer flexibility and support to employees. The modern support desk requires specialists to be knowledgeable in the usage of third-party remote software, cloud-based collaboration and sharing, Firewalls, VPN client configuration, remote desktop tools, and the virtual desktop interface. This course runs students through several real-world scenarios and hands-on labs.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>Explain key applications and connectivity options of remote work environments.</li> <li>Perform analysis, diagnosis, and resolution of connectivity issues faced in a hybrid workforce environment.</li> <li>Identify the key security principles of various cloud infrastructures, apps, and storage choices.</li> <li>Compare and contrast Virtual workspaces, VDI, and Desktop as a Service (DaaS).</li> <li>Demonstrate professional, clear, and concise verbal and written communication.</li> </ul>  |  |             |              |
| <b>TEIT 1040</b>   | <b>Introduction to Virtualization</b>                                | <b>1.00</b> | <b>30.00</b> |
| <p>Introduction to Virtualization explores what virtualization is and the critical role it plays in IT. Learn how to install, configure, and maintain virtual machines as well as the availability, applications, and virtual appliances, including their role in virtualization.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>Explore virtualization and the benefits gained from a virtual environment.</li> <li>Demonstrate how to enable virtualization on a host system.</li> <li>Install operating systems on virtual machines.</li> <li>Import/Export virtual machines for use in different virtualization platforms.</li> <li>Configure basic processing, memory, storage, and networking in a virtual environment.</li> <li>Demonstrate how to copy, backup, and restore virtual machines.</li> </ul>  |  |             |              |
| <b>TEIT 1640</b>   | <b>Deploying the Modern Desktop</b>                                  | <b>1.00</b> | <b>30.00</b> |
| <p>As desktops have evolved, so have methods for deploying and updating them. In this course, you'll learn how to plan and implement an operating system deployment strategy. This course will help students understand the various methods available, the scenarios they're suited for, as well as how to deploy Windows using modern methods. This course will also cover planning and implementing an update strategy for Windows.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>Develop an Operating System deployment and upgrade strategy.</li> <li>Understand the different methods of deployment.</li> <li>Understand which scenarios on-premise and cloud-based solutions can be used for.</li> <li>Deploy and migrate desktop operating systems.</li> <li>Plan and configure Windows Update policies.</li> </ul>   |  |             |              |
| <b>TEIT 1630</b>   | <b>Microsoft Windows Server Administration Fundamentals</b>          | <b>2.00</b> | <b>60.00</b> |
| <p>The Microsoft Windows Server Administration Fundamentals course offers a hands-on introduction to Windows Server administration. The student will explore basic systems administration of workstations and servers in a Windows domain, emphasizing the use of Active Directory for common everyday add, move, and change tasks.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>Identify, define, and describe server roles, features, and services.</li> <li>Install, configure, and manage server roles and services including Domain Controllers, Active Directory, Group Policy, DHCP, DNS, and Remote Access Services.</li> <li>Recognize and implement the proper share permissions on File and Print Servers.</li> <li>Implement effective storage solutions using RAID and other fault-tolerant storage technologies.</li> <li>Identify the importance of security updates and software update packages.</li> <li>Perform server troubleshooting, performance tuning, and maintenance.</li> <li>Explain fault-tolerance and disaster recovery.</li> <li>Configure, manage, monitor, and troubleshoot security in a Directory Services Infrastructure.</li> </ul> |  |             |              |

| <b>TEIT 1800</b>   | <b>Certification Test Prep I</b>   | <b>1.00</b> | <b>30.00</b> |
| <p>Certification Test Prep I provides instruction in preparation for industry exams. Students will access additional testing materials and resources for their exam preparation. Students will review the exam outline, objectives, grading scale, requirements, and recommendations for the specified industry exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify areas for improvement of certification learning objectives.</li> <li>• Demonstrate competency by passing practice tests.</li> <li>• Demonstrate proficiency in test-taking strategies.</li> <li>• Schedule and take the certification exam.</li> </ul>  |                                    |             |              |
| <b>TEIT 1810</b>   | <b>Certification Test Prep II</b>  | <b>1.00</b> | <b>30.00</b> |
| <p>Certification Test Prep II provides instruction in preparation for industry exams. Students will access additional testing materials and resources for their exam preparation. Students will review the exam outline, objectives, grading scale, requirements, and recommendations for the specified industry exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify areas for improvement of certification learning objectives.</li> <li>• Demonstrate competency by passing practice tests.</li> <li>• Demonstrate proficiency in test-taking strategies.</li> <li>• Schedule and take the certification exam.</li> </ul>   |                                    |             |              |
| <b>TEIT 1820</b>   | <b>Certification Test Prep III</b> | <b>1.00</b> | <b>30.00</b> |
| <p>Certification Test Prep III provides instruction in preparation for industry exams. Students will access additional testing materials and resources for their exam preparation. Students will review the exam outline, objectives, grading scale, requirements, and recommendations for the specified industry exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify areas for improvement of certification learning objectives.</li> <li>• Demonstrate competency by passing practice tests.</li> <li>• Demonstrate proficiency in test-taking strategies.</li> <li>• Schedule and take the certification exam.</li> </ul>  |                                    |             |              |
| <b>TEIT 1830</b>   | <b>Certification Test Prep IV</b>  | <b>1.00</b> | <b>30.00</b> |
| <p>Certification Test Prep IV provides instruction in preparation for industry exams. Students will access additional testing materials and resources for their exam preparation. Students will review the exam outline, objectives, grading scale, requirements, and recommendations for the specified industry exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify areas for improvement of certification learning objectives.</li> <li>• Demonstrate competency by passing practice tests.</li> <li>• Demonstrate proficiency in test-taking strategies.</li> <li>• Schedule and take the certification exam.</li> </ul>   |                                    |             |              |
| <b>TEIT 2350</b>   | <b>CompTIA Project +</b>           | <b>3.00</b> | <b>90.00</b> |
| <p>This course studies the planning and processes involved in an information technology project. Topics include planning, scheduling, and controlling aspects of a project during its life cycle. The course introduces students to project management and explains project management as it applies to managing information technology. It also helps students develop the skills required to initiate, plan, execute, control, and close projects. This course prepares students for exams such as the CompTIA Project + certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Explain the benefits of IT project management.</li> <li>• Examine the project management lifecycle.</li> <li>• Demonstrate how to establish a project charter and project team.</li> <li>• Demonstrate project estimating and scheduling.</li> <li>• Describe the creation of project plans and project reporting.</li> </ul>   |                                    |             |              |
| <b>TEIT 2900</b>   | <b>IT Externship</b>               | <b>2.00</b> | <b>90.00</b> |
| <p>Students will have the opportunity to develop real-world work experiences using knowledge and skills they have obtained in the program. Students will gain practical application of classroom skills through actual work situations. IT projects will be assigned to the student by cooperative businesses. Students will receive objective feedback on their performance each month. Customized student learning objectives will be developed addressing the individual needs of the organization and career interests of each student by the cooperative business and the student.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Apply decision-making, critical-thinking, troubleshooting, and problem-solving skills.</li> <li>• Demonstrate ability to work independently.</li> <li>• Demonstrate ability to receive constructive criticism.</li> <li>• Write cooperatively with faculty and agency to create personalized objectives to be accomplished during the internship.</li> </ul> |                                    |             |              |

| <b>TEIT 2250</b>   | <b>Ethical Hacking</b>        | <b>3.00</b> | <b>90.00</b> |
| <p>Ethical Hacking teaches fundamental network attack strategies and countermeasures. Students learn to use various penetration testing tools to analyze network vulnerabilities and how to counter them and improve network security. This course aligns with the Certified Ethical Hacker (CEH) objectives.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Perform: reconnaissance, scanning, and enumeration.</li> <li>• Demonstrate Access: Obtain login credentials, administrative access and escalate privileges, access by cracking.</li> <li>• Perform Attacks: Perform passive and active online attacks and infrastructure attacks.</li> <li>• Demonstrate Defense Techniques: Defend systems and devices, implement defensive systems, scan for vulnerabilities.</li> </ul>   |                               |             |              |
| <b>TEIT 2270</b>   | <b>Cybersecurity Analysis</b> | <b>3.00</b> | <b>90.00</b> |
| <p>Cybersecurity Analysis teaches threat and vulnerability management and how to employ tools and methods to secure data and infrastructure and respond to security incidents. The CompTIA CySA+ objectives are covered and serves as a foundation for advanced security credentials.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Implement appropriate tools and methods to perform a reconnaissance of a system or network.</li> <li>• Gather data and analyze the results of a reconnaissance.</li> <li>• Describe and implement techniques and procedures needed to secure an organization.</li> <li>• Classify threat data or activities for their impact on a security incident.</li> <li>• Manage incident response, recovery, and reporting</li> </ul>   |                               |             |              |
| <b>TEIT 2300</b>   | <b>Linux +</b>                | <b>3.00</b> | <b>90.00</b> |
| <p>Linux + provides instructions on how to install, configure, manage, and maintain a Linux server. Topics include: SSH, VNC, Webmin, NIS and LDAP. Students learn to install, configure, and administer a Linux server. This course aligns with the CompTIA Linux + objectives.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Configure the Linux file systems.</li> <li>• Configure file sharing services.</li> <li>• Configure network services.</li> <li>• Demonstrate competency with Linux Administration Tools.</li> </ul>  |                               |             |              |
| <b>TEIT 2900</b>   | <b>IT Externship</b>          | <b>2.00</b> | <b>90.00</b> |
| <p>Students will have the opportunity to develop real-world work experiences using knowledge and skills they have obtained in the program. Students will gain practical application of classroom skills through actual work situations. IT projects will be assigned to the student by cooperative businesses. Students will receive objective feedback on their performance each month. Customized student learning objectives will be developed addressing the individual needs of the organization and career interests of each student by the cooperative business and the student.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Apply decision-making, critical-thinking, troubleshooting, and problem-solving skills.</li> <li>• Demonstrate ability to work independently.</li> <li>• Demonstrate ability to receive constructive criticism.</li> <li>• Write cooperatively with faculty and agency to create personalized objectives to be accomplished during the internship.</li> </ul>     |                               |             |              |
| <b>TEIT 2910</b>   | <b>Special Projects I</b>     | <b>1.00</b> | <b>30.00</b> |
| <p>Special Projects I provides students with a unique or advanced skill development identified as a need in industry. Students will select their chosen topic from a previous course subject and draft a project proposal. After the project is completed, the student and faculty member will review the success of the project compared to the proposal. (Requires advisor approval).</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Apply decision-making, critical-thinking, troubleshooting, and problem-solving skills.</li> <li>• Create a draft proposal for a project focusing on networking, cybersecurity, or operating systems.</li> <li>• Develop a project outline that defines the purpose, scope, and potential challenges they may face. Present the outline to faculty for approval.</li> <li>• Demonstrate project management skills as they complete their project and work with the instructor to evaluate its success according to their purpose, scope, and outline.</li> </ul>  |                               |             |              |

|---|-------------------------------|------|---------------|
| <p>The Microsoft Azure Fundamentals course is an introduction to the Microsoft Azure cloud platform and includes instruction on foundational cloud concepts, the Azure management portal, Azure architecture and services, Azure storage and workloads, security and privacy in Azure, as well as Azure resource deployment, service monitoring, pricing, and cost management. This course aligns with the objectives of the Microsoft AZ 900 Azure Fundamentals certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Describe Azure cloud concepts, services, workloads, security and privacy.</li> <li>• Describe Azure core architectural components and services.</li> <li>• Describe Azure compute and networking services.</li> <li>• Describe Azure management and governance.</li> </ul> |                               |      |               |
| TEIT 1800   | Certification Test Prep I     | 1.00 | 30.00         |
| <p>Certification Test Prep I provides instruction in preparation for industry exams. Students will access additional testing materials and resources for their exam preparation. Students will review the exam outline, objectives, grading scale, requirements, and recommendations for the specified industry exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify areas for improvement of certification learning objectives.</li> <li>• Demonstrate competency by passing practice tests.</li> <li>• Demonstrate proficiency in test-taking strategies.</li> <li>• Schedule and take the certification exam.</li> </ul>   |                               |      |               |
| TEIT 1810   | Certification Test Prep II    | 1.00 | 30.00         |
| <p>Certification Test Prep II provides instruction in preparation for industry exams. Students will access additional testing materials and resources for their exam preparation. Students will review the exam outline, objectives, grading scale, requirements, and recommendations for the specified industry exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify areas for improvement of certification learning objectives.</li> <li>• Demonstrate competency by passing practice tests.</li> <li>• Demonstrate proficiency in test-taking strategies.</li> <li>• Schedule and take the certification exam.</li> </ul>  |                               |      |               |
| TEIT 1820   | Certification Test Prep III   | 1.00 | 30.00         |
| <p>Certification Test Prep III provides instruction in preparation for industry exams. Students will access additional testing materials and resources for their exam preparation. Students will review the exam outline, objectives, grading scale, requirements, and recommendations for the specified industry exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify areas for improvement of certification learning objectives.</li> <li>• Demonstrate competency by passing practice tests.</li> <li>• Demonstrate proficiency in test-taking strategies.</li> <li>• Schedule and take the certification exam.</li> </ul>   |                               |      |               |
| TEIT 2270   | Cybersecurity Analysis        | 3.00 | 90.00         |
| <p>Cybersecurity Analysis teaches threat and vulnerability management and how to employ tools and methods to secure data and infrastructure and respond to security incidents. The CompTIA CySA+ objectives are covered and serves as a foundation for advanced security credentials.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Implement appropriate tools and methods to perform a reconnaissance of a system or network.</li> <li>• Gather data and analyze the results of a reconnaissance.</li> <li>• Describe and implement techniques and procedures needed to secure an organization.</li> <li>• Classify threat data or activities for their impact on a security incident.</li> <li>• Manage incident response, recovery, and reporting</li> </ul>  |                               |      |               |
| TEIT 1110   | Introduction to Cybersecurity | 1.00 | 30.00         |
| <p>This course will provide foundational cybersecurity knowledge in preparation for more advanced cybersecurity courses as well as an introduction to career prospects in cybersecurity.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify various types of security software.</li> <li>• Demonstrate the use of software to mitigate risk in a lab environment.</li> <li>• Define security best practices.</li> <li>• Analyze various software logs.</li> <li>• Summarize major risk frameworks.</li> <li>• Identify social engineering techniques.</li> <li>• Identify accurate and trustworthy security news sources.</li> <li>• Explore career opportunities in cybersecurity.</li> </ul>  |                               |      |               |
| Snow College (Required Hours: 270, Credits: 9)  |                               |      | Credits Hours |

| <b>CIS 1000</b>   | <b>Orientation</b>                | <b>1.00</b> | <b>30.00</b> |
|---|-----------------------------------|-------------|--------------|
| <p>Orientation is designed to introduce students to the program and degree pathway for the CIS department. Students will be introduced to the curriculum, pathways, and industry certifications. Students will be introduced to the learning model utilized in the department to include; online/hybrid instruction, required clock hours in class, and program outcomes. Students will learn how to utilize software platforms used in the program for learning (e.g., Canvas, NetAcad, and Packet Tracer).</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Describe the coursework, pathway, certificates, and degree.</li> <li>• Describe and operate within the CIS department educational model.</li> <li>• Describe the industry certifications and specialized departmental badges.</li> <li>• Demonstrate proficiency with Canvas, NetAcad, and Packet Tracer.</li> </ul>   |                                   |             |              |
| <b>CIS 1130</b>   | <b>Networking Essentials</b>      | <b>2.00</b> | <b>60.00</b> |
| <p>Networking Essentials will introduce students to the importance of networking in a digital world, and introduced network essentials required in many business functions today including business critical data and operations, cybersecurity, and much more. Students will learn to install a home and small business network, develop basic network troubleshooting skills, and recognize network threats and basic mitigation techniques.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Plan and install simulated home or small business networks and wireless networks.</li> <li>• Verify settings and troubleshoot network connectivity.</li> <li>• Identify and mitigate network security threats.</li> </ul>  |                                   |             |              |
| <b>CIS 1500</b>   | <b>Introduction to IOT</b>        | <b>3.00</b> | <b>90.00</b> |
| <p>Introduction to IOT is designed to give the student an introduction to the Internet of Things (IoT). Students will learn how these devices connect, how they expand and transform our current technology, and considerations for securing these devices. Students will also learn the basics of the IoT technology and receive a better understanding of smart devices and the role they play in the modern world technology landscape.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Discuss how the current digital transformation is creating unprecedented economic opportunity.</li> <li>• Describe how the IoT (Internet of Things) is bridging the gap between operational and information technology systems.</li> <li>• Describe how standard business processes are being transformed.</li> <li>• Identify the security concerns that must be considered when implementing IoT solutions.</li> </ul>   |                                   |             |              |
| <b>CIS 2310</b>   | <b>Cybersecurity Essentials</b>   | <b>3.00</b> | <b>90.00</b> |
| <p>Cybersecurity Essentials will introduce students to the essentials of network security concepts using Cisco equipment. Students will become familiar with network attackers and their attacks, security basics, network and web security, cryptography, operational security, firewalls, adaptive security appliances, policies and procedures related to network security.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Describe security threats facing modern network infrastructures and secure network device access.</li> <li>• Describe authentication, authorization, and access principles for network access and implement AAA on network devices.</li> <li>• Mitigate network threats utilizing access control lists.</li> <li>• Secure network management and reporting channels.</li> <li>• Configure firewall and adaptive security appliances (ASA).</li> <li>• Configure site-to-site VPNs utilizing the IPsec protocol.</li> <li>• Describe and effective security policies related to the administration and security of a routed network.</li> </ul> |                                   |             |              |
| <i>Tooele Technical College (Required Hours: 270, Credits: 9)</i>   |                                   | Credits     | Hours        |

Students will review the exam outline, objectives, grading scale, requirements, and recommendations for the specified industry exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify areas for improvement of certification learning objectives.</li> <li>• Demonstrate competency by passing practice tests.</li> <li>• Demonstrate proficiency in test-taking strategies.</li> <li>• Schedule and take the certification exam.</li> </ul>  |  |             |              |
| <b>TEIT 1150</b>  | <b>Cisco CCNA Introduction to Networks</b>                           | <b>3.00</b> | <b>90.00</b> |
| <p>CCNA Introduction to Networks curriculum introduces the architectures, models, protocols, and networking elements that connect users, devices, applications and data through the Internet and across modern computer networks. Learn to build simple local area networks (LANs) that integrate IP addressing schemes, configure foundational network security, and perform basic configurations for routers and switches.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Build simple LANs, perform basic configurations for routers and switches, and implement IPv4 and IPv6 addressing schemes.</li> <li>• Configure routers, switches, and end devices to provide access to local and remote network resources and to enable end-to-end connectivity between remote devices.</li> <li>• Develop critical thinking and problem-solving skills using real equipment and Cisco Packet Tracer.</li> <li>• Configure and troubleshoot connectivity of a small network using security best practices.</li> </ul>          |  |             |              |
| <b>TEIT 1160</b>  | <b>Cisco CCNA Switching, Routing, and Wireless Essentials (SWRE)</b> | <b>3.00</b> | <b>90.00</b> |
| <p>The Cisco CCNA Switching, Routing, and Wireless Essentials (SWRE) course focuses on switching technologies and router operations that support small-to-medium business networks and includes wireless local area network (WLAN) and security concepts. Students learn key switching and routing concepts. They can perform basic network configuration and troubleshooting, identify and mitigate local area network (LAN) security threats, and configure and secure a basic WLAN.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Utilizing routers, switches and wireless devices, configure and troubleshoot VLANs, Wireless LANs and Inter-VLAN routing.</li> <li>• Configure and troubleshoot redundancy on a switched network using STP and EtherChannel.</li> <li>• Develop critical thinking and problem-solving skills using real equipment and Cisco Packet Tracer.</li> <li>• Explain how to support available and reliable networks using dynamic addressing and first-hop redundancy protocols.</li> </ul> |  |             |              |

| <b>TEIT 2150</b>  | <b>Cisco CCNA Enterprise Networking, Security, and Automation (ENSA)</b> | <b>3.00</b> | <b>90.00</b> |
| <p>The Cisco Certified Networking Associate (CCNA) Enterprise Networking, Security, and Automation course covers the architecture, security, and operation of an enterprise network, along with introducing new ways in which network engineers interact with programmable infrastructure. Gain skills to configure and troubleshoot enterprise networks, learn to identify and protect against cybersecurity threats, and discover key concepts of software-defined networking, including controller-based architectures and application programming interfaces (APIs).</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Configure routers and switches using OSPF in point-to-point and multiaccess networks.</li> <li>• Mitigate threats and enhance network security using access control lists and security best practices.</li> <li>• Develop critical thinking and problem-solving skills using real equipment and Cisco Packet Tracer.</li> <li>• Explore virtualization, SDN, and how APIs and configuration management tools enable network automation.</li> </ul> |  |             |              |
| <b>TEIT 2300</b>  | <b>Linux +</b>   | <b>3.00</b> | <b>90.00</b> |
| <p>Linux + provides instructions on how to install, configure, manage, and maintain a Linux server. Topics include: SSH, VNC, Webmin, NIS and LDAP. Students learn to install, configure, and administer a Linux server. This course aligns with the CompTIA Linux + objectives.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Configure the Linux file systems.</li> <li>• Configure file sharing services.</li> <li>• Configure network services.</li> <li>• Demonstrate competency with Linux Administration Tools.</li> </ul>   |  |             |              |
| <b>TEIT 2250</b>  | <b>Ethical Hacking</b>   | <b>3.00</b> | <b>90.00</b> |
| <p>Ethical Hacking teaches fundamental network attack strategies and countermeasures. Students learn to use various penetration testing tools to analyze network vulnerabilities and how to counter them and improve network security. This course aligns with the Certified Ethical Hacker (CEH) objectives.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Perform: reconnaissance, scanning, and enumeration.</li> <li>• Demonstrate Access: Obtain login credentials, administrative access and escalate privileges, access by cracking.</li> <li>• Perform Attacks: Perform passive and active online attacks and infrastructure attacks.</li> <li>• Demonstrate Defense Techniques: Defend systems and devices, implement defensive systems, scan for vulnerabilities.</li> </ul>  |  |             |              |
| <b>TEIT 2270</b>  | <b>Cybersecurity Analysis</b>  | <b>3.00</b> | <b>90.00</b> |
| <p>Cybersecurity Analysis teaches threat and vulnerability management and how to employ tools and methods to secure data and infrastructure and respond to security incidents. The CompTIA CySA+ objectives are covered and serves as a foundation for advanced security credentials.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Implement appropriate tools and methods to perform a reconnaissance of a system or network.</li> <li>• Gather data and analyze the results of a reconnaissance.</li> <li>• Describe and implement techniques and procedures needed to secure an organization.</li> <li>• Classify threat data or activities for their impact on a security incident.</li> <li>• Manage incident response, recovery, and reporting</li> </ul>  |  |             |              |
| <b>TEIT 2910</b>  | <b>Special Projects I</b>  | <b>1.00</b> | <b>30.00</b> |
| <p>Special Projects I provides students with a unique or advanced skill development identified as a need in industry. Students will select their chosen topic from a previous course subject and draft a project proposal. After the project is completed, the student and faculty member will review the success of the project compared to the proposal. (Requires advisor approval).</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Apply decision-making, critical-thinking, troubleshooting, and problem-solving skills.</li> <li>• Create a draft proposal for a project focusing on networking, cybersecurity, or operating systems.</li> <li>• Develop a project outline that defines the purpose, scope, and potential challenges they may face. Present the outline to faculty for approval.</li> <li>• Demonstrate project management skills as they complete their project and work with the instructor to evaluate its success according to their purpose, scope, and outline.</li> </ul>   |  |             |              |
| <b>TEIT 2920</b>  | <b>Special Projects II</b>   | <b>2.00</b> | <b>60.00</b> |
| <p>Special Projects II provides students with a unique or advanced skill development identified as a need in industry. | TEIT 1610   | Microsoft Azure Fundamentals | 2.00 | 60.00   |       |
| <p>The Microsoft Azure Fundamentals course is an introduction to the Microsoft Azure cloud platform and includes instruction on foundational cloud concepts, the Azure management portal, Azure architecture and services, Azure storage and workloads, security and privacy in Azure, as well as Azure resource deployment, service monitoring, pricing, and cost management. This course aligns with the objectives of the Microsoft AZ 900 Azure Fundamentals certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Describe Azure cloud concepts, services, workloads, security and privacy.</li> <li>• Describe Azure core architectural components and services.</li> <li>• Describe Azure compute and networking services.</li> <li>• Describe Azure management and governance.</li> </ul>   |                              |      |         |       |
| TEIT 1600   | Microsoft 365 Fundamentals   | 3.00 | 90.00   |       |
| <p>The Microsoft 365 Fundamentals course provides instruction on how Microsoft 365 solutions address common organizational technology challenges including productivity, collaboration, and communication. Topics include endpoint and application management, desktop virtualization, automated operating system deployment, Microsoft 365 licensing, deployment and migration assistance, and product support options. This course aligns with the objectives of the Microsoft MS 900 certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Identify and describe cloud concepts.</li> <li>• Describe core Microsoft 365 services and solutions.</li> <li>• Describe security, compliance, privacy, and trust in Microsoft 365.</li> <li>• Compare and contrast Microsoft 365 licensing, pricing, and support option.</li> </ul>  |                              |      |         |       |
| TEIT 2320   | Hybrid Server Core           | 4.00 | 120.00  |       |
| <p>The Hybrid Server Core course teaches configuring and managing Windows Server on-premises, hybrid, and Infrastructure as a Service platform workloads. Learn on-premises and hybrid solutions, such as identity, security, management, compute, networking, storage, monitoring, and disaster recovery. Microsoft AZ-800 Certification objectives are covered.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Deploy and manage Active Directory Domain Services in on-premises and cloud environments.</li> <li>• Manage Windows Servers and workloads in a hybrid environment.</li> <li>• Manage virtual machines and containers.</li> <li>• Implement and manage an on-premises and hybrid networking infrastructure.</li> <li>• Manage storage and file services.</li> </ul>  |                              |      |         |       |
| TEIT 2330   | Hybrid Server Advanced       | 4.00 | 120.00  |       |
| <p>The Hybrid Server Advanced course focuses more on security, high availability, backup and recovery, troubleshooting, monitoring, and migration from on-premises to Azure. Microsoft AZ-801 certification objectives are covered.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Manage Windows Servers and workloads in a hybrid environment.</li> <li>• Secure Windows Server on-premises and hybrid infrastructures.</li> <li>• Implement and manage Windows Server high availability.</li> <li>• Implement disaster recovery.</li> <li>• Migrate servers and workloads.</li> <li>• Monitor and troubleshoot Windows Server environments.</li> </ul>  |                              |      |         |       |
| <i>Uintah Basin Technical College (Required Hours: 270, Credits: 9)</i>   |                              |      | Credits | Hours |
| TEIT 1012   | Introduction to Python       | 2.00 | 60.00   |       |
| <p>Intro to Python will cover functional programming in python. Students will learn common functions, loops, operators, and conditionals. They will learn how to implement and manipulate lists, tuples, and dictionaries. They will create basic python scripts such as Fizzbuzz and text-based adventure games. This course will prepare students for further python training.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Demonstrate understanding of Python functions, create custom functions.</li> <li>• Demonstrate understanding of loops, and conditionals.</li> <li>• Create a text-based adventure game utilizing all tools learned.</li> </ul>   |                              |      |         |       |

| <b>TEIT 2106</b>   | <b>Technical Installation</b>     | <b>2.00</b> | <b>60.00</b> |
| <p>This course will focus on combining technical skills with light construction. Students will learn how to install and configure physical network infrastructure, security and door access, and smart home technologies. This course will provide instruction in the use of small construction tools including stud finders, cordless drills, saws etc. This course covers the basics of low-voltage technician skills. Students will also learn basic electronic soldering skills.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Demonstrate the use of basic network and construction tools.</li> <li>• Successfully install and configure smart home technologies, security devices, and network infrastructure.</li> <li>• Explain basic low-voltage electrical theory.</li> </ul>  |                                   |             |              |
| <b>TEIT 2250</b>   | <b>Ethical Hacking</b>            | <b>3.00</b> | <b>90.00</b> |
| <p>Ethical Hacking teaches fundamental network attack strategies and countermeasures. Students learn to use various penetration testing tools to analyze network vulnerabilities and how to counter them and improve network security. This course aligns with the Certified Ethical Hacker (CEH) objectives.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Perform: reconnaissance, scanning, and enumeration.</li> <li>• Demonstrate Access: Obtain login credentials, administrative access and escalate privileges, access by cracking.</li> <li>• Perform Attacks: Perform passive and active online attacks and infrastructure attacks.</li> <li>• Demonstrate Defense Techniques: Defend systems and devices, implement defensive systems, scan for vulnerabilities.</li> </ul>   |                                   |             |              |
| <b>TEIT 2350</b>   | <b>CompTIA Project +</b>          | <b>3.00</b> | <b>90.00</b> |
| <p>This course studies the planning and processes involved in an information technology project. Topics include planning, scheduling, and controlling aspects of a project during its life cycle. The course introduces students to project management and explains project management as it applies to managing information technology. It also helps students develop the skills required to initiate, plan, execute, control, and close projects. This course prepares students for exams such as the CompTIA Project + certification exam.</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Explain the benefits of IT project management.</li> <li>• Examine the project management lifecycle.</li> <li>• Demonstrate how to establish a project charter and project team.</li> <li>• Demonstrate project estimating and scheduling.</li> <li>• Describe the creation of project plans and project reporting.</li> </ul>   |                                   |             |              |
| <b>TEIT 2910</b>   | <b>Special Projects I</b>         | <b>1.00</b> | <b>30.00</b> |
| <p>Special Projects I provides students with a unique or advanced skill development identified as a need in industry. Students will select their chosen topic from a previous course subject and draft a project proposal. After the project is completed, the student and faculty member will review the success of the project compared to the proposal. (Requires advisor approval).</p> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Apply decision-making, critical-thinking, troubleshooting, and problem-solving skills.</li> <li>• Create a draft proposal for a project focusing on networking, cybersecurity, or operating systems.</li> <li>• Develop a project outline that defines the purpose, scope, and potential challenges they may face. Present the outline to faculty for approval.</li> <li>• Demonstrate project management skills as they complete their project and work with the instructor to evaluate its success according to their purpose, scope, and outline.</li> </ul>  |                                   |             |              |
